

A blank clipboard template. At the top is a rectangular header box. Below it is a horizontal line. The main body is a table with 5 rows and 2 columns, separated by a vertical line. The rightmost column contains a 2x3 grid of small squares in the last two rows.

The diagram shows a parallel circuit. At the top, a battery is represented by a long horizontal rectangle. Below the battery, the circuit branches into six parallel paths, each containing a light bulb. The bulbs are represented by a circle with a filament inside. After the bulbs, the circuit branches recombine and return to the battery.

This image shows a full page of handwriting practice paper. It features multiple rows of horizontal lines designed to help children learn letter formation. Each row consists of three lines: a solid top line, a dashed middle line, and a solid bottom line. Vertical lines are placed at regular intervals down the page to provide additional guidance for letter width and alignment. The paper is otherwise blank, with no text or markings other than the guide lines.[illegible]
